***Assumption:** You have a valid Polygon-based Wallet Address on MetaMask app on your mobile device.
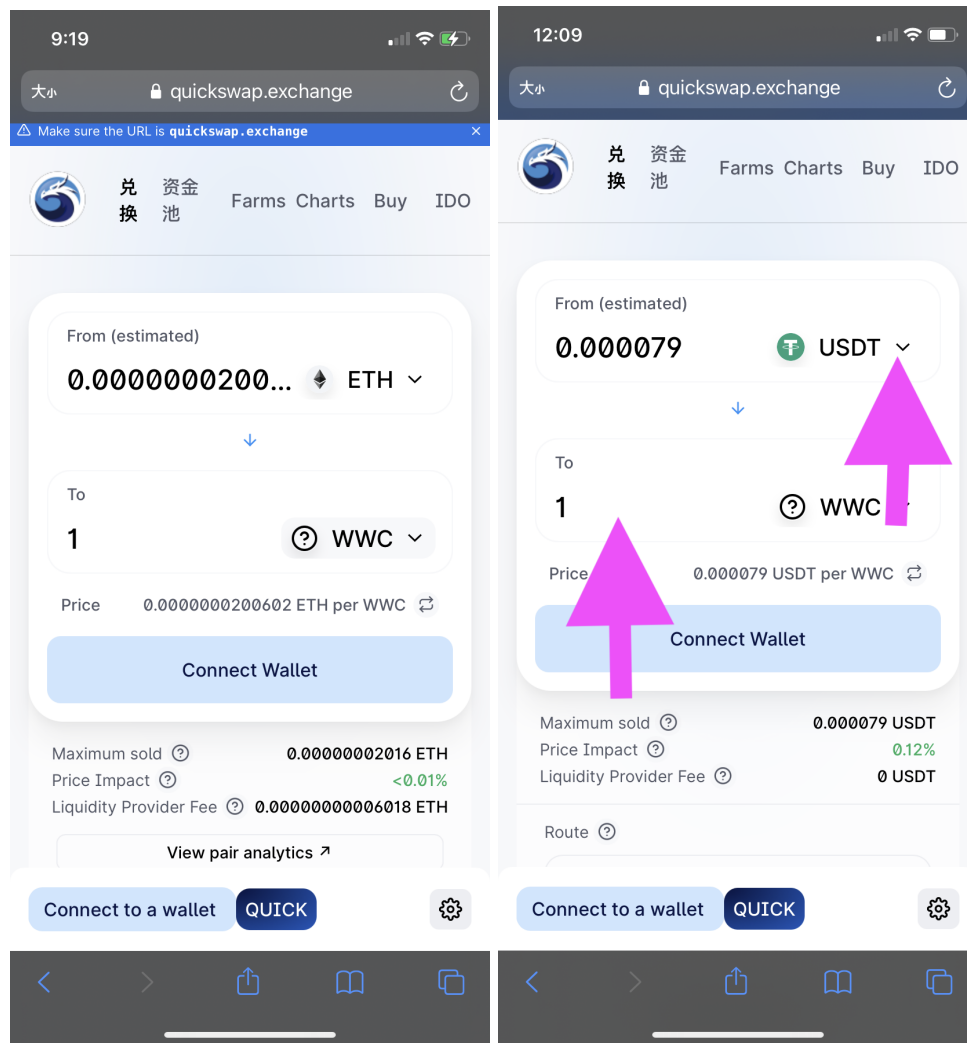

1. From WeWin.net homepage -> Click "Purchase" from top menu to go to WWC QuickSwap Page: https://quickswap.exchange/#/swap?theme=light&inputCurrency=0x7ceb23fd6bc0add59e62ac25578270cff1b9f619&outputCurrency=0x3EBDC31a24F4A61e5e86399b294F4A61e5e86399b96Dact.exact&inputCurrency=0x7ceb23fd6bc0add59e62ac25578270
   Check "I Understand" -> Click "Continue"

2. From the Pair Swap page, Choose **USDT** from the top token dropdwon -> Keep bottom token dropdown as **WWC** , change quantity to 1 -> you will now see the current market price of WWC in USD:
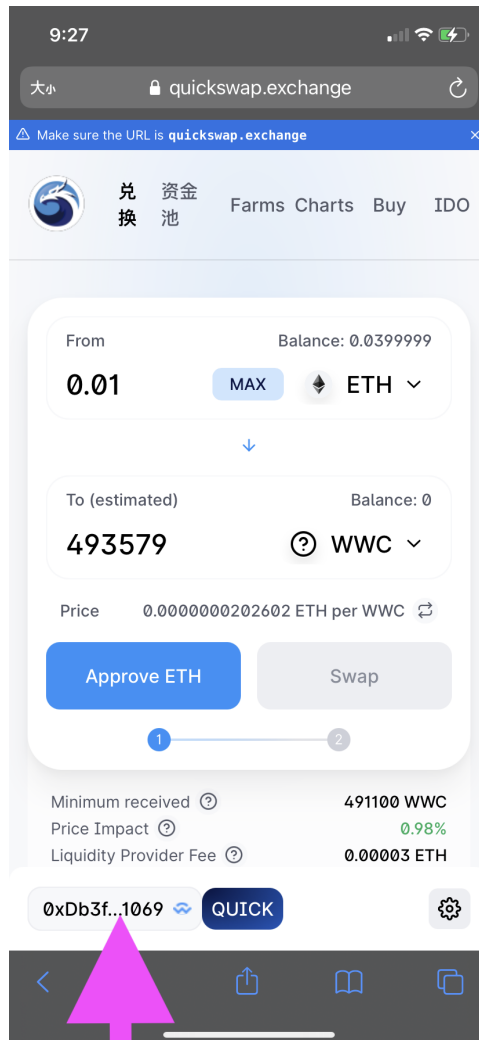

3. Now you need to connect your **MetaMas**k wallet to the Swap page in order to proceed -> click "Connect Wallet" button -> and select **"WalletConnect"** option to connect to your MetaMask app
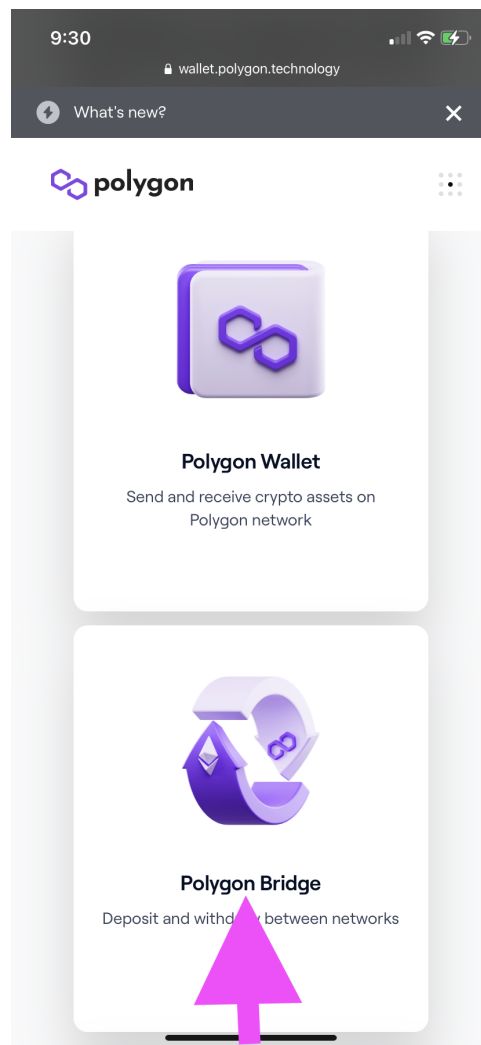

4. From the popup menu -> select **"MetaMask "** at right top corner -> you will then be directed to your Metamask wallet -> click "Connect" to complete the connection.
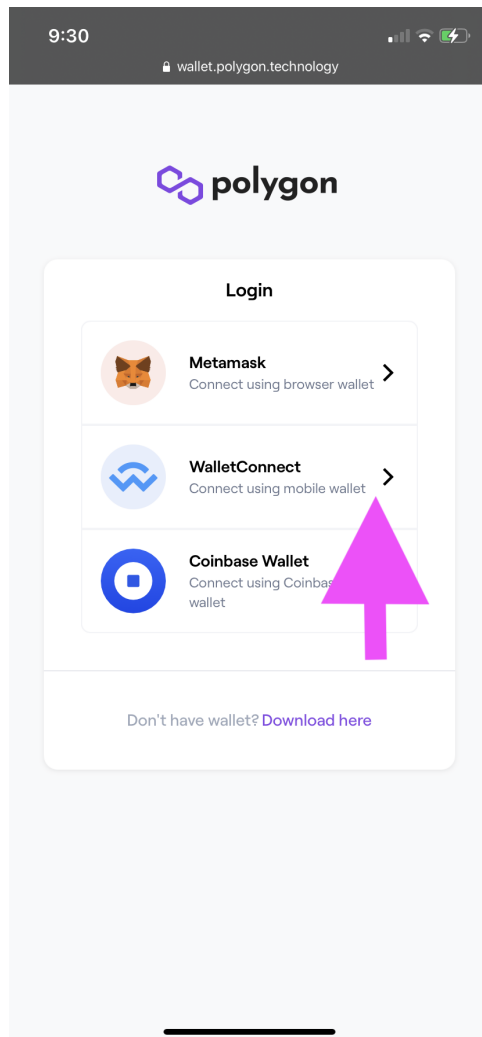

5. Return to your browser -> If Wallet is connected successfully, wallet address is shown at bottom left corner -> If your Polygon-based wallet already has sufficient **USDC/USDT/ETH**, you can now swap for **WWC**
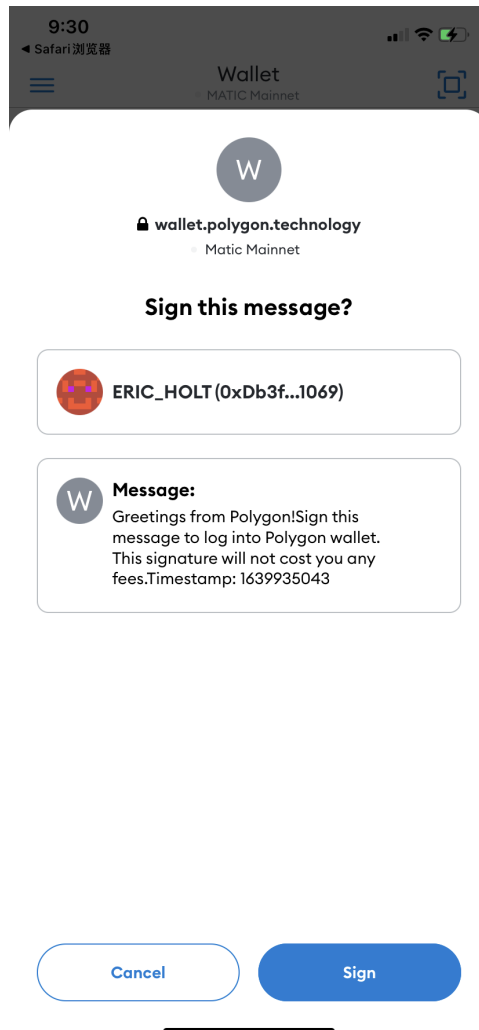

6. If your Polygon wallet does not have sufficient **USDC/USDT/ETH** , you will then need to use the "Bridge" feature to port these tokens from your same wallet address on Ethereum Network into your Polygon wallet. -> From your browser enter https://wallet.polygon.technology/ -> Click second tile "**Polygon Bridge"**
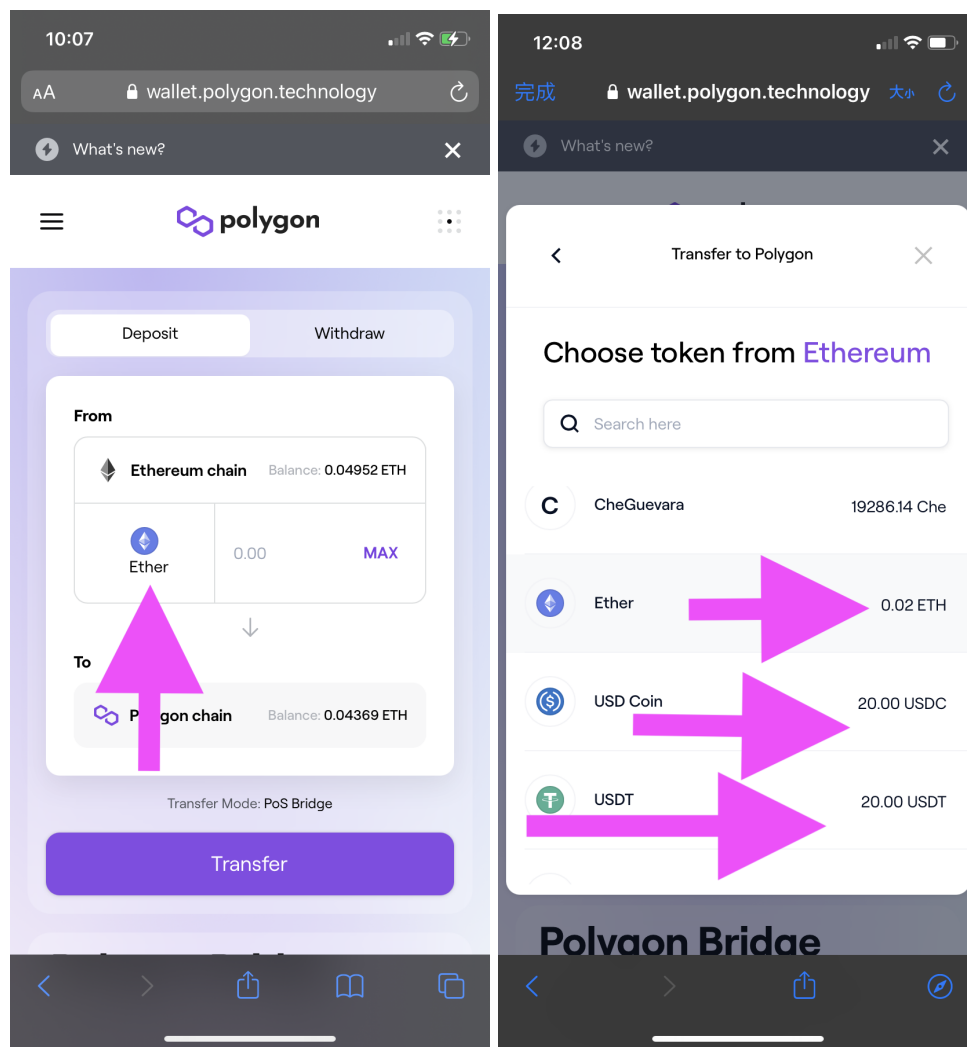

7. You will also need to connect your Wallet to the page -> from the menu select **"WalletConnect"** -> select " **MetaMask"**

8. You will be prompted to "Sign Message', meaning to confirm your wallet's connection to the page -> click "Sign" button to confirm

9. Now return to the Bridge page on browser -> Here you will see your same wallet address on Ethereum Network, and the available **ETH / USDT / USDC** balance -> Click "Ether" token dropdown to popup a list of available tokens at your wallet address -> select one of **ETH/ USDC / USDT ,** and confirm bridging to your wallet on Polygon Chain.

10. Confirm your selected token and quantity -> Click "Transfer" on the page to complete bridging > Now you can use your **ETH/USDC/USDT** balance on your Polygon wallet and return to the QuickSwap page at step 1 to purchase **WWC !**
